

A Primer for the Digital Edition of the Canadian Sportsman

Navigating Quickly Through a PDF Document Using Adobe Reader or Acrobat

We here at The Canadian Sportsman strongly suggest upgrading to the latest version of Acrobat Reader to view our Digital Edition if that is your program of choice for viewing PDF documents. The latest version is 7.0.8. and is a free download from Adobe.

Here is a brief guideline for Tool Tips and Keyboard Shortcuts to make navigating through a pdf document faster and easier. Reader and Acrobat work basically the same on both platforms (PC, Mac). Visually they are close in appearance so the tips will be consistent.

We have developed links to each of the pages from the Index Page as well as links to advertiser's web pages from their ads. There are also links setup to go to a continuing page or previous page if a story cover more than one page.

So explore, have some fun and enjoy this edition of the Canadian Sportsman.

We will use the CONTROL key on the PC keyboard and the COMMAND key on a Mac keyboard.

Zoom IN using keyboard keys
(Control) & (+) keys
(Command) & (+) keys

Zoom OUT using keyboard keys
(Control) & (-) keys
(Command) & (-) keys

Fit document size to screen
(Control) & (0) keys
(Command) & (0) keys

Find Function
(Control) & (f) keys
(Command) & (f) keys

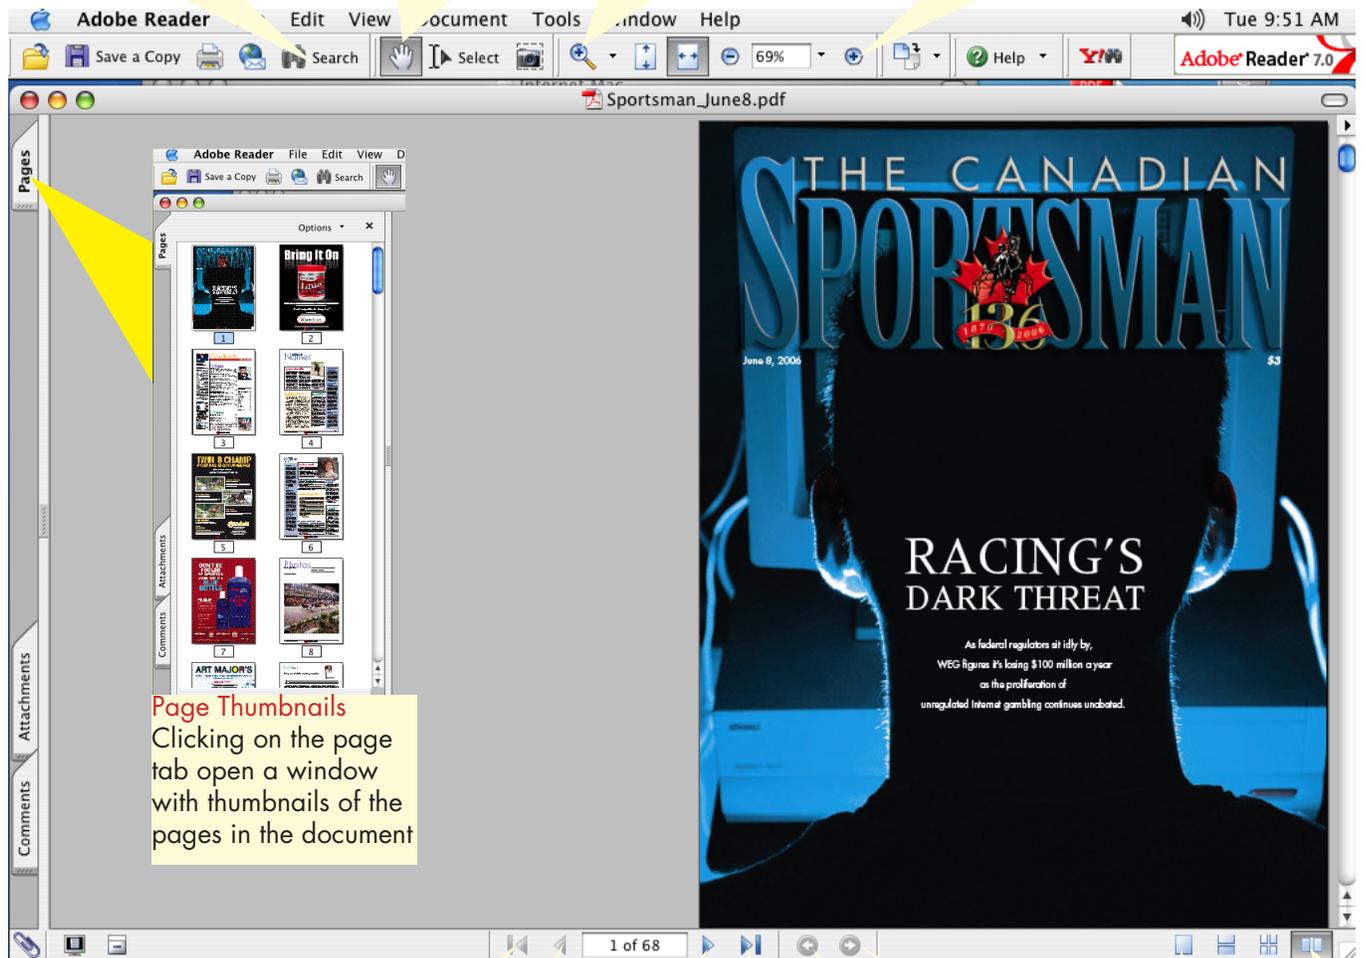

Search Function
Clicking on this button lets you search the pdf for certain word(s) and takes you to the page when selected

Grasp Tool
If you click with your mouse and hold, you can drag the document around instead of using the scroll arrows.

Magnification Wand
Select this button and marquee the area you want to view

Magnification Buttons
Clicking on these buttons lets you increase or decrease the view

This feature lets you search the document for key words entered into the find function and takes you directly to that page in the pdf.

Page Thumbnails
Clicking on the page tab open a window with thumbnails of the pages in the document
